SUMMARY

Backend Developer focused on C#/.NET, with hands-on experience in building backend applications and managing self-hosted infrastructure. Interested in DevOps, cloud technologies and automation, with practical experience in Docker, Kubernetes, GitOps and CI/CD.
Currently studying Backend & Cloud Development at NBI Handelsakademin, combining software development with practical infrastructure projects.

SKILLS

- Backend: C#, .NET, ASP.NET Core, REST APIs, Entity Framework Core
- Frontend: React, TypeScript, JavaScript
- DevOps & Infrastructure: Docker, Kubernetes, Proxmox, Linux, Git, GitHub Actions, ArgoCD, GitOps, CI/CD
- Cloud & Hosting: AWS, Azure, Cloudflare, Coolify
- Databases: PostgreSQL, SQL Server, Supabase

PROJECTS

Homelab – Kubernetes & GitOps

Designed and maintain a self-hosted Kubernetes environment using bare-metal infrastructure.

- Built a Kubernetes cluster using kubeadm and deployed applications through Argo CD using the App-of-Apps pattern.
- Automated server configuration and infrastructure provisioning using Ansible and Terraform.
- Implemented GitOps workflows with automated synchronization and deployment management.
- Established CI validation, YAML linting and secret scanning to maintain configuration quality.

Technologies: Kubernetes, Argo CD, GitOps, Ansible, Terraform, Linux, GitHub Actions

Platform Pipelines – CI/CD

Developed reusable CI/CD workflows to standardize build, validation and security processes across software projects.

- Created reusable GitHub Actions workflows for .NET and Node.js applications.
- Integrated automated testing, container image building and vulnerability scanning using Trivy.
- Implemented SBOM generation and container image signing with Cosign.
- Focused on improving consistency, security and reliability across development pipelines.

Technologies: GitHub Actions, Docker, .NET, Node.js, Trivy, Cosign, SBOM

ProxmoxDash – Infrastructure Monitoring

Developed a real-time infrastructure monitoring dashboard for managing and monitoring Proxmox environments.

- Built a backend using ASP.NET Core and Clean Architecture.
- Implemented real-time infrastructure updates using SignalR.
- Developed a React and TypeScript frontend for monitoring virtual machines, containers and system resources.
- Integrated Proxmox API communication and browser-based SSH access.
- Deployed the application in a self-hosted environment using Cloudflare Tunnel and Access.

Technologies: C#, ASP.NET Core, SignalR, React, TypeScript, Proxmox, Docker, Cloudflare

WORK EXPERIENCE

Max Burgers – Shift Manager / Driftledare Partille & Trollhättan **June 2021 – Present**

- Responsible for daily operations and coordinating team activities during shifts.
- Supported and guided team members to maintain operational standards.
- Handled problem-solving and operational challenges in a fast-paced environment.
- Developed leadership, communication and teamwork skills.

Nytida – Support Worker / Boendestödjare Tingsryd **2018 – 2021**

- Supported individuals in their daily activities and personal development.
- Worked independently while collaborating with colleagues.
- Developed strong communication, responsibility and problem-solving skills.

EDUCATION

NBI Handelsakademin – Backend & Cloud Development Gothenburg

Focus areas:

- Backend development with C# and .NET
- Cloud technologies and infrastructure
- Database design and API development
- Docker, containerization and deployment
- Introduction to AWS and Azure

Graduating: June, 2027

High School Diploma – Technology Program

- Graduated: June, 2021

LANGUAGES

- Swedish – Professional proficiency
- English – Fluent
- Persian (Farsi) – Native
